

Climatic modular chamber

The innovation as an attitude

The company

Ineltec is a company with more than 20 years of experience in the sector and 5.000 equipment installed all around the world. Our achievements are due to the ability of offering customized solutions to perform any kind of test.

"Technology, research and innovation are the basis for creating equipment of high reliability."

Model

Climatic modular
chamber of
Ineltec

Climatic modular chambers are made
according to customer specifications.

Model

equipment description

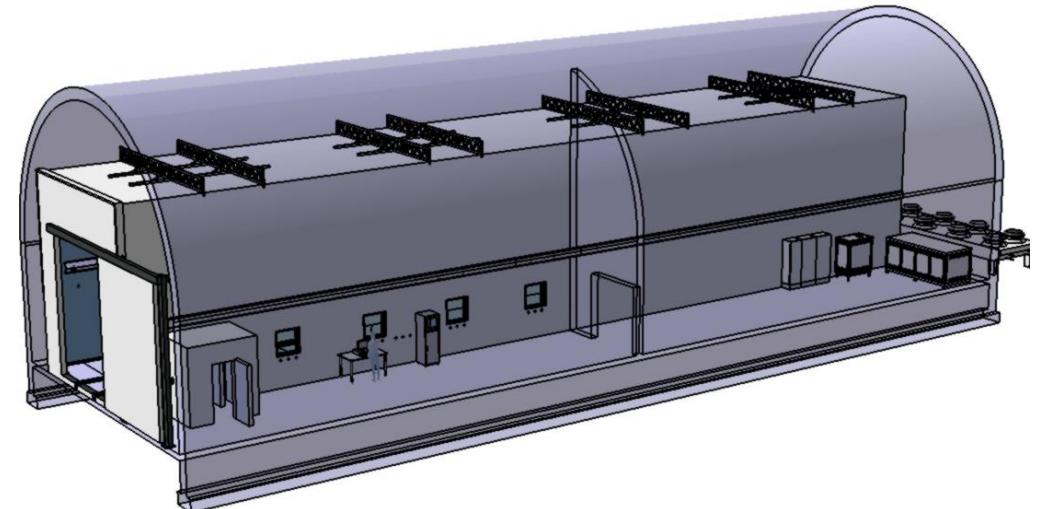

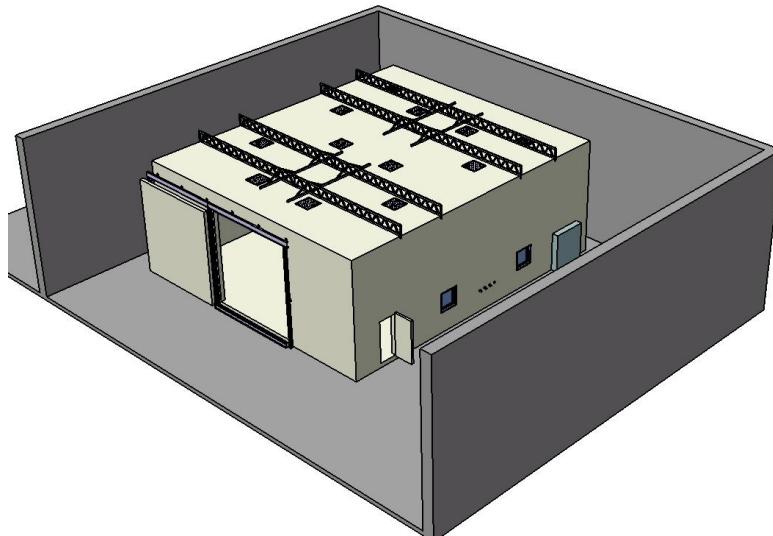

Climatic modular chambers simulated the environmental conditions of heat and cold combined with humidity.

The maximum temperature ranges are from -70°C to +85°C.
It is possible to modify or widen the characteristics according to the specifications

The climatic chambers are used in all the industrial sectors, because they fulfill climatic tests regulations for any product or material.

Volumes

01 from 2000 liters

Sectors

									
Aerospace, Aeronautics,	Construction, Luminary,	Pharmacist , Cosmetics ,	Plastic, Chemistry,	Biology Biotechnology,	I+D, Technological	Electronics, Appliances,	Defense, Armament	Mining Steel,	Textile
Automotive,	Wood ,	Veterinary ,	Petroleum,	Agribiology,	Centers, Universities,	Telecommunicat		Galvanic	
Railway	Cork,	Agrifood	Carton,	Insects	Laboratories			Metallurgy	
Naval	Glass, Coatings , Wiring, Ceramics		Paper industry, Rubber			Mechanical construction, metallurgy			

Regulations

DIN	EN	UNE	NF	ICH	FDA	ISO	ASTM	MIL	STD	VDA
IEC	BS	VG	IRAM	ETS	Telcordia	ECSS	RTCA	TR	SAE	UL
GR	NTS	ETSI	NEBS	NCh	SEMI	AS	NZS	ANSI	NMX	IRAM
ABNT	UNIT	INTN	NTP	...						

Features of the equipment

Construction

01

01/ inside/outside

Both the interior and the exterior are made of injected polyurethane panels.

02

02/ electrical cabinet

In the external part od the chamber, it is placed the electrical box.

03

03/ Observation windows

In some cases, it can be installed windows to see inside the chamber.

04

04/ Access holes

Climatic chambers have access holes for introduction of electrical wiring or calibration sensors.

05

05/ Systems

Modular chambers consist of refrigeration, heating, humidifying and drying systems.

06

06/ Control system

The touch screen computer with software of simple control and intuitive programming allows acquisition, registration and control of all variables.

Features of the equipment

Functional properties

Climatic modular model	Maximum temperature range	Range H.R.
Vol. Liters	-70°C	10%
	+65°C	98%
From 2.000	*	*

Stability
Temp. $\pm 0,3^{\circ}\text{C}$ max.
H.R. $\pm 2\%$ max.

Resolution
Temp. $0,1^{\circ}\text{C}$
H.R. 0,1%

Accuracy
Temp. $\pm 0,5^{\circ}\text{C}$ max.
H.R. $\pm 2\%$ max.

Homogeneity
Temp. $\pm 2^{\circ}\text{C}$ max.
H.R. $\pm 2\%$ max.

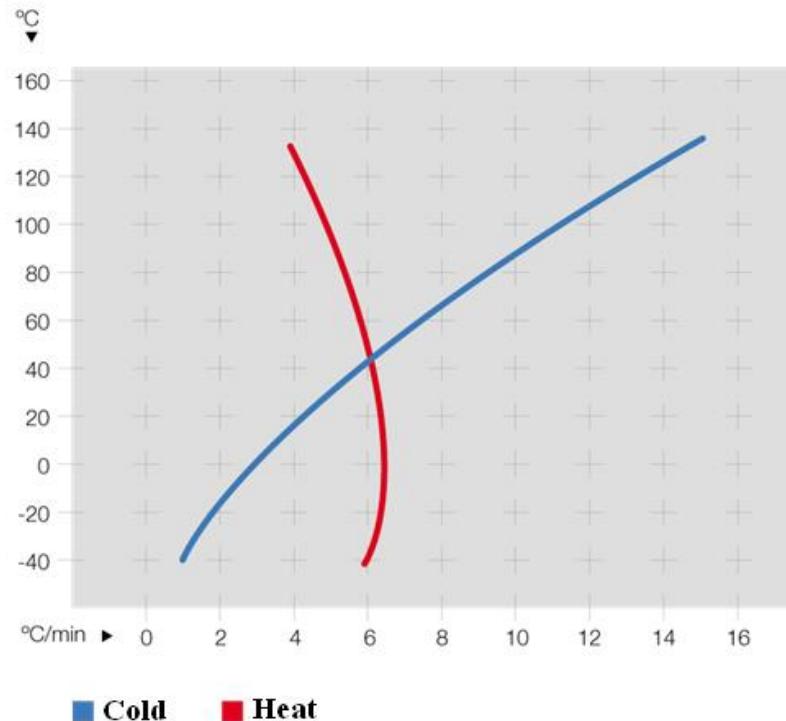

***Other characteristics on request**

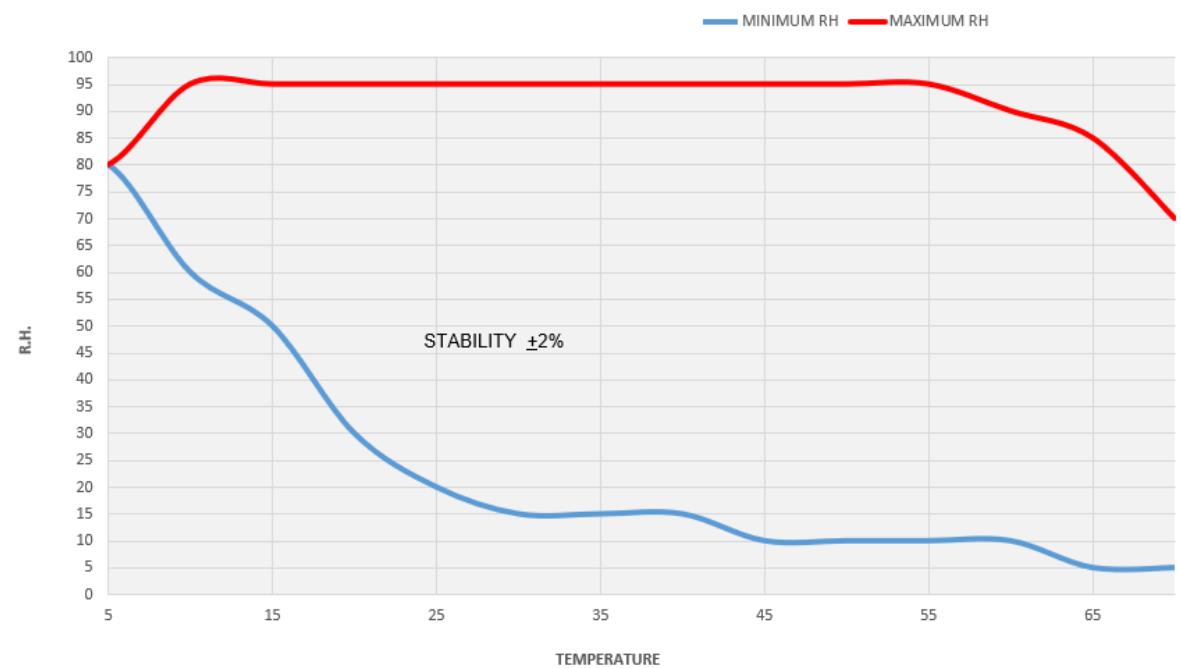

Features of the equipment

graphics

Gradients according to IEC-60068-3-5

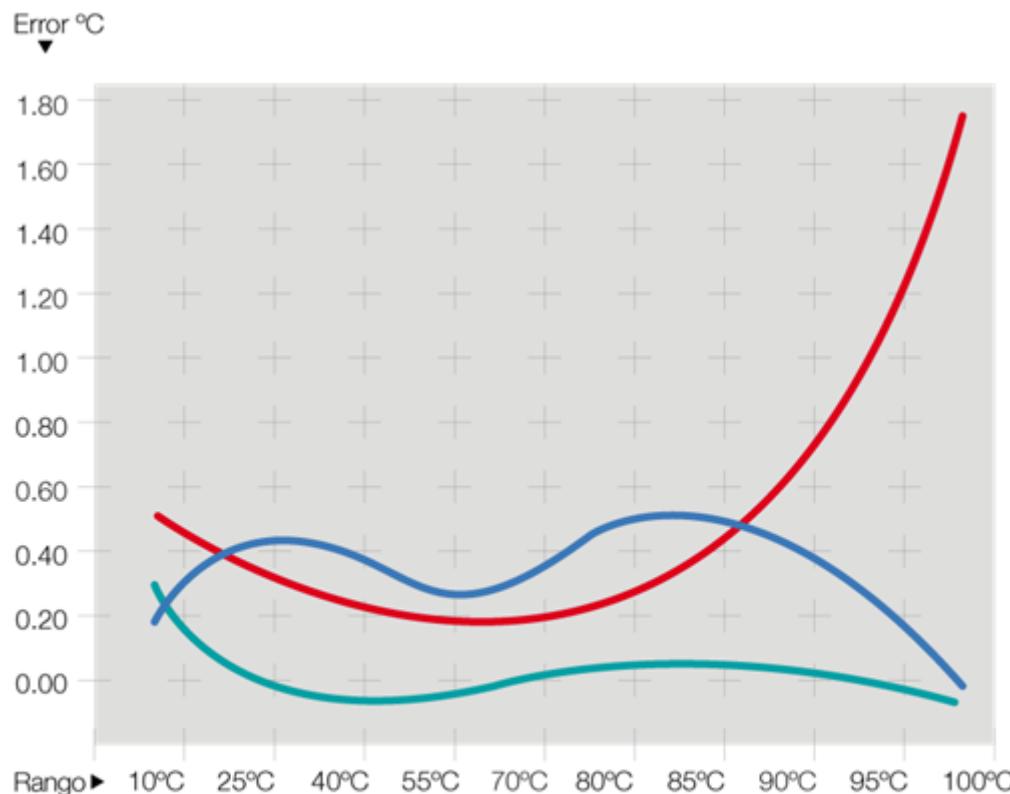

Work range H.R.

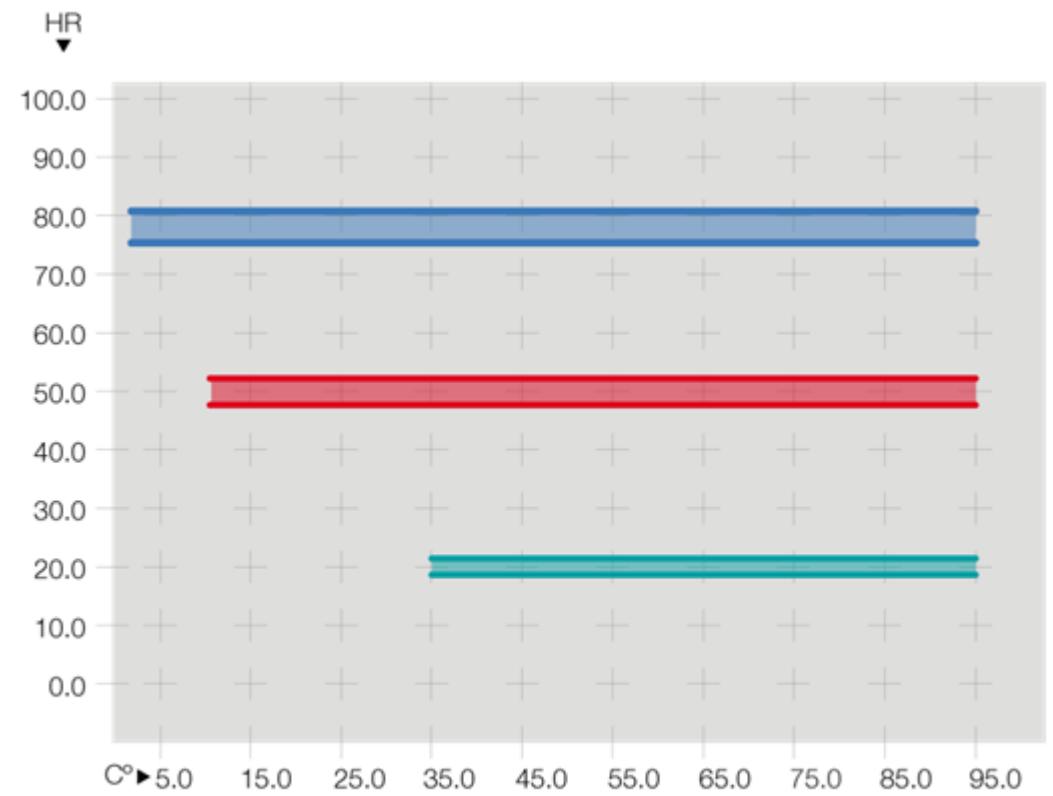

Features of the equipment

graphics

Temperature error

Stability H.R. / T^a

■ Uniformity error (+/-)

■ Reading error (+/-)

■ Stability

■ R.H. Stability 20%

■ R.H. Stability 50%

■ R.H. Stability 80%

Control systems

Touch screen PC

*software/
using*

With the PROCAM-WIN software can perform the programming, acquisition, recording, monitoring and analysis of results.

*software/
characteristics*

- 1 / Manual or automatic programming.
- 2 / Boot up Programming test in specific day and time
- 3 / It lets to write down during the tests
- 4 / Different access levels
- 5/ Maximum 11 operators
- 6/ More than 100 programs
- 7/ Maximum 100 segments per program
- 8/ Linking up to 4 programs
- 9/ 1 to 999999 or infinite programming cycles
- 10/ Visualization and record of the tests in a graphic or table
- 11/ Option to export to Excel or similar
- 12/ Setting of minimum and maximum limits for alarms of temperature and humidity for each cycle.
- 13/ Controlling from distance through Ethernet, WIFI and WEB

Characteristics

- 01 USB
- 02 Ethernet
- 03 Wi-Fi (optional)
- 04 CF Socket
- 05 VGA Com.
- 06 RS 232 Com.
- 07 PS/2
